

Shortened Helical Antennas

The book is an author version of one of the chapters from the book: Antennas: Ham Practice. The book was published in Moscow, in 2006. The book published in Russian.

Book contains topics on design, tuning and measurement of the home made Shortened Helical Antennas intended for operation in the amateurs' HF- Band. There are published theoretical and practically obtained data for Shortened Helical Antennas. The book described some practical design of the helical antennas. Hope the book would be useful for those who attempts make and tune such antennas.
