

High- Height Invisible Antennas

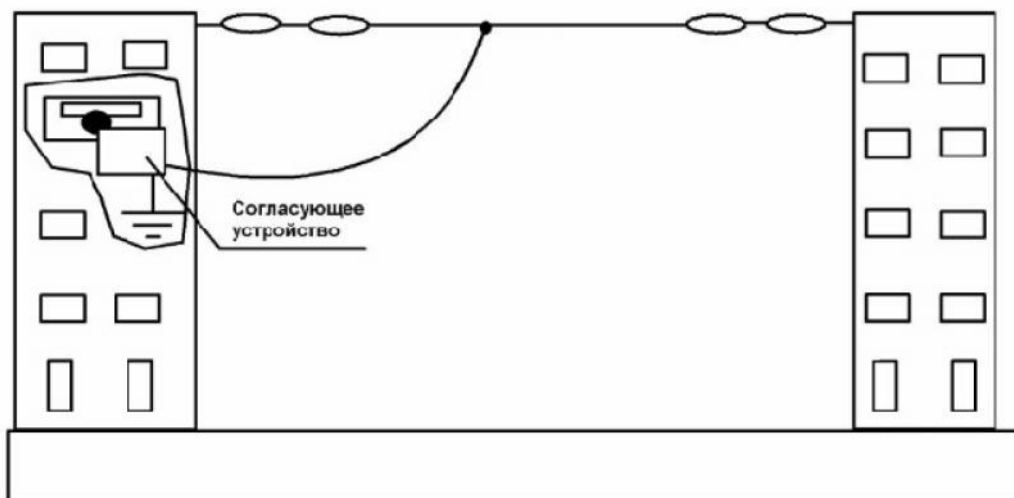

The book is an author version of one of the chapters from the book: Antennas: Ham Practice. The book was published in Moscow, in 2006. *The book published in Russian.*

Book contains topics on design and installation of High Height Invisible Antennas that allows to Radio Amateur use the radio in the city being invisible at the side. There are published some theoretical data and practical recommendation and proved antenna that would be helpful for creation of own High Height Invisible Antennas.

Hope the book would be useful for those who attempts make and tune such antennas.
