

Old Commercial UHF Licence

Well, when I was involved in the service of VHF/UHF radio in the GTA, I have seen sometimes strange things. Be truth not strange, but abandoned old radio rooms... There were located on the roof of some buildings... I always had nostalgia feeling when I have chance to explore the rooms.

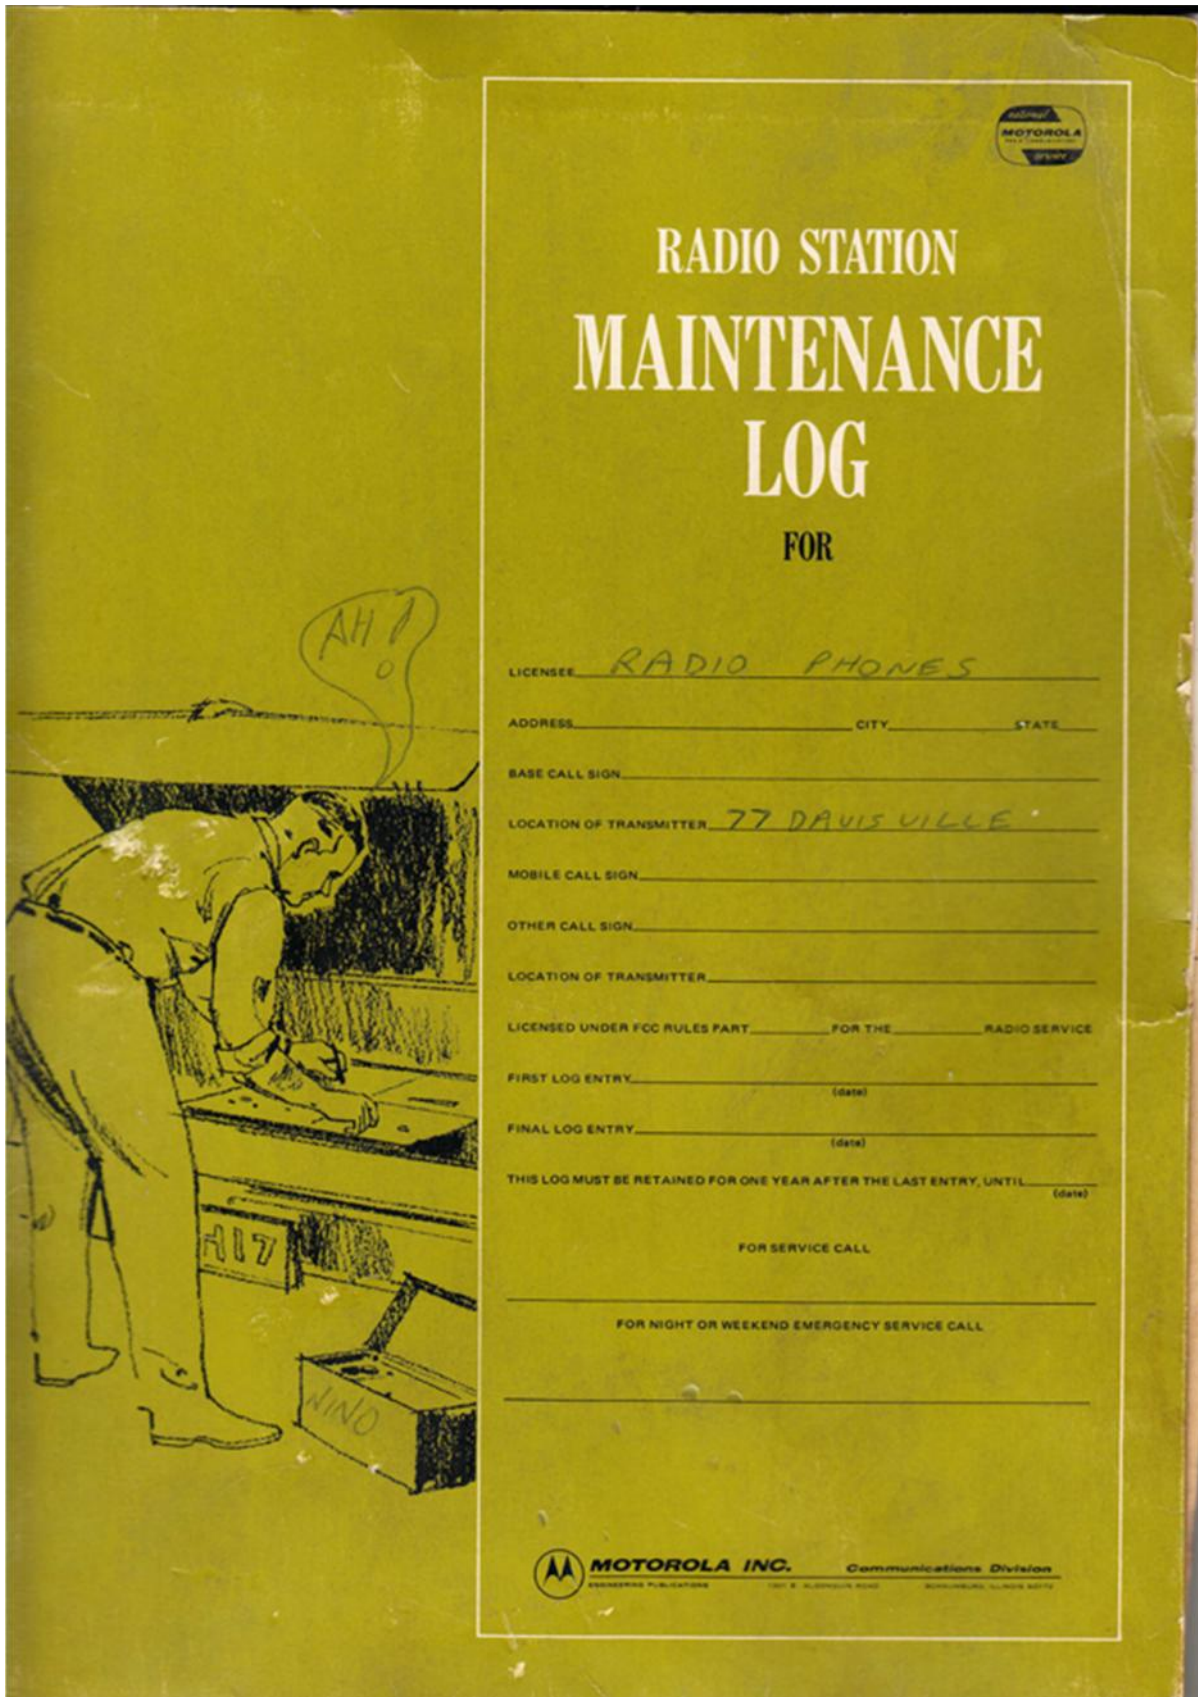

Old coaxial going to the old mast, or just coiled at the corner of the room. Old tools on the shelves. And dust, dust laying around in one inch of the thickness...

Old radio equipment, old massive metal shelves with equipment, old UPS with big sizes battery near...

Cell communications made the radio service out date and it was finished, the room was abandoned with the equipment which was too costly to remove from the room. In the one of such abandoned radio room I found old radio log with licence. It was in the central table of the room... When the service was closed somebody just leaved the log with the licence at the table like a last silence cry from the heart...
