

ANTENTOP

ANTENTOP 01 2021 # 025

ANTENTOP is **FREE** e-magazine devoted to **ANTENna's**
Theory,
1-2021 **Operation, and**
Practice

Edited by hams for hams

In the Issue:

Practical design of HF Antennas!

Practical design of Antennas for the 50-MHz Band!

SWL Antennas!

Unusual Propagation!

Free Books!

**RA1AFS Universal Antenna for
the HF Bands**

Thanks to our authors:

Kurt R Rudolph, KD7JYK

***Nick Kudryavchenko,
UR0GT***

Vitaliy Nekrasov, RA1AFS

Igor Vakhreev, RW4HFN

And others.....

US2INV Struts from Old Plastic Bottles

EDITORIAL:

Well, my friends, new ANTENTOP – 01 - 2021 come in! ANTENTOP is just authors' opinions in the world of amateur radio. A little note, I am not native English, so, of course, there are some sentence and grammatical mistakes there... Please, be indulgent! ANTENTOP 01 –2021 contains antenna articles, Books for download, articles on the unusual propagation of the radio waves. Hope it will be interesting for you. Our pages are opened for all amateurs, so, you are welcomed always, both as a reader as a writer.

Copyright: Here at ANTENTOP we just wanted to follow traditions of **FREE** flow of information in our great radio hobby around the world. **A whole issue** of ANTENTOP may be photocopied, printed, pasted onto websites. We don't want to control this process. It comes from all of us, and thus it belongs to all of us. This doesn't mean that there are no copyrights.

There is! *Any work is copyrighted by the author. All rights to a particular work are reserved by the author.*

Contact us: Just email me
igor.grigorov@gmail.com

NB: Please, use only plain text and mark email subject as: **igor_ant**. I receive lots spam, so, I delete **ALL** unknown me messages **without** reading.

ANTENTOP is **FREE** e-magazine, available **FREE** at <http://www.antentop.org/>

Welcome to ANTENTOP, FREE e - magazine!

ANTENTOP is **FREE e- magazine**, made in **PDF**, devoted to Antennas and Amateur Radio. Everyone may share his experience with others hams on the pages. Your opinions and articles are published without any changes, as I know, every your word has the mean.

Every issue of ANTENTOP is going to have 100 pages and this one will be paste in whole on the site. I do not know what a term for one issue would be taken, may be 12 month or so. A whole issue of ANTENTOP holds nearly 10- 30 MB.

A little note, I am not native English, so, of course, there are some sentence and grammatical mistakes there... Please, be indulgent!

Copyright Note:

Dear friends, please, note, I respect Copyright. Always, when I want to use some stuff for ANTENTOP, I ask owners about it. But... sometimes my efforts have no success. I have some very interesting stuff from closed websites however their owners keep silence... as well as I have no response on some my emails from some owners.

Publishing: If you have something for share with your friends, and if you want to do it **FREE**, just send me an email. Also, if you want to offer for publishing any stuff from your website, you are welcome!

Your opinion is important for me, so, contact if you want to say something!

I have a big collection of pictures. I have got the pictures and stuff in different ways, from **FREE websites**, from commercial CDs, intended for **FREE using**, and so on... I use to the pictures (and seldom, some stuff from free and closed websites) in ANTENTOP. **If the owners of the Copyright stuff have concern**, please, contact with me, I immediately remove any Copyright stuff, or, if it is necessary, all needed references will be made there.

Business Advertising: ANTENTOP is not a commercial magazine. Authors and I (Igor Grigorov, the editor of the magazine) do not get any profit from any issue. But of course, I do not mention from commercial ads in ANTENTOP. It allows me to do the magazine in most great way, allows me to pay some money for authors to compensate their hard work.

So, if you want paste a commercial advertisement in ANTENTOP, please contact me.

Book Advertising: I believe that **Book Advertising** is a noncommercial advertisement. So, Book Advertising is **FREE** at ANTENTOP. Contact with me for details.

Email: igor.grigorov@gmail.com

Editorial

Table of Contents

HF- Antenna Practice

Page

- 1 RW4HFN Compact Dipole Antenna for the 80- and 40- meter Band:
Igor Vakhreev, RW4HFN** **7- 8**
- Compact Dipole Antenna for the 80- and 40- meter Band takes a little room and cover broad range at the bands...
- 2 RW4HFN Compact Dipole Antenna for the 40- and 20- meter Band:
Igor Vakhreev, RW4HFN** **9- 11**
- In the summer 2017, when the winter with winds and ice storm was far away, I decided to install a Low Profile wind and ice rain resistant antenna. Why I decided do this? There were some important reasons. My Beverage Antenna was remade. Now the antenna wire was not going along wooden fence but hang upped in the space. Efficiency of the antenna is grown up but reliability went down. Canadian winter with strong winds and ice rain may very make my Beverage antenna down. So I need weather proof antenna in case if the Beverage antenna cannot stand the winter....
- 3 5- Element YAGI Antenna for the 20- meter Band:
Nikolay Kudryavchenko, UR0GT** **12- 13**
- The simplest antenna that could provide operation on all HF bands is a Delta Antenna. The antenna made in the shape of Delta needs minimum points for installation, does not required grounding like a vertical does and the antenna is not critical to nearest objects. The antenna does not required high mast for installation. If the antenna made as one band one it may feed direct through a coaxial cable. However for multiband operation the antenna is required a matching device at its feed-points...
- 4 RA1AFS Universal Antenna for the HF Bands:
Vitaliy Nekrasov, RA1AFS** **14- 19**
- Antenna at apartment building is all time it is not an easy task to do. However the Simple Dipole Antenna that may be installed at the wall of the building is covered bands from the 80- m up to 10- meter band...
- 5 No Counterpoises Antenna for the 7 MHz Band:
Vitaliy Nekrasov, RA1AFS** **20- 22**
- Problem for any vertical antenna is counterpoises that should be placed around of the antenna. However the counterpoises maybe substituted by a length of coaxial cable that is closed at the end and rounded across the radiator...
- 6 RZ9CJ Three Inverted Vertical Antennas for the 160, 80, and 40- meter Band:
Sergey Popov, RZ9CJ** **23- 25**
- Simple and effective antenna for 160, 80 and 40- meter Band may be realized as an Inverted Vertical. Inverted Vertical is differed from widely spread Inverted Dipole just an additional wire. However the antenna is most efficiently compare to the usual IV antenna...

Table of Contents

	Page
7 Inverted L Antenna for the 160, 80 and 40- meter Band: Nikolay Kudryavchenko, UR0GT	26- 29
<p>Near already existing 10- meter TV metal mast it is possible to install IL antenna that will work at 160, 80 and 40- meter Band...</p>	
8 Antenna for 40- meter Band with Short Counterpoises: Nikolay Kudryavchenko, UR0GT	30- 31
<p>For good operation a vertical antenna in height of lambda/4 requires good ground or several counterpoises in length of lambda/4. However it is often not possible condition in amateur site at the place of the antenna...</p>	
9 Low Height Loop Antenna for 40- 6 meter Bands : Nikolay Kudryavchenko, UR0GT	32- 37
<p>Everyone knows the Golden Rule of the radio amateur antenna- the higher the antenna is placed, the better for radio communication. Unfortunately, it is not always possible to install the antenna at right height above the ground...</p>	
10 UR5VFT Symmetrical Vertical for 7- 30- MHz : Vladimir Mitasov, UR5VFT	38- 39
<p>I have installed so called Symmetrical Vertical on the roof. The antenna was made according to recommendation of the RV3MS. Support mast was made from plastic tube in four meter length. On the mast was installed an old CB Antenna in 6.4- meter length. Antenna was installed at three meter above the concrete roof...</p>	
11 Simple Wire Antenna for 3.5, 7, 14 and 28- MHz Band: Gennady Shkumat, UA9AAP	40
<p>The simple wire antenna works at the 3.5, 7, 14 and 28-MHz band. It was tested in the Air for several months with 40- Watt transceiver and shows very good result...</p>	
12 Simple I.V. Antenna for 80-, 40-, 20-, 15- and 10- meter Band: Vladimir Fursenko, UA6CA	41
<p>It is very simple I. V. antenna that works at 80-, 40-, 20- 15- and 10- meter band...</p>	
13 Twin Delta Antenna with Phase Feeding Elements for the 20 meter Band: Vladimir Roshupkin, RV3ZH	42
<p>An efficiency antenna for the 20- meter band is a Twin Delta Loop with phase feeding elements...</p>	
14 Experiments with Loop Antennas: Victor Pisanov, UA9OS and Gennady Yudin, UA9PP	43- 44
<p>Directional loop antennas are popular in the radio amateurs. The antennas were investigated by the radio amateurs and they developed lots of different variants of the loop antenna. Authors of the articles stay on the same page and tried investigate and improved design and performance of the loop antenna...</p>	

Table of Contents

		Page
15	UR0GT Long Quad Antennas for the 28- MHz Band: Nikolay Kudryavchenko, UR0GT	45- 49
	Long Quad antennas are very interesting family of the simple and at that time high gain antennas. The antennas may have 50 or 75- Ohm input impedance.	
16	Four One Band Antennas on One Mast: Sergey Popov, RZ9CJ	50
	It is possible place four one band antennas for 7, 14, 21 and 28- MHz on one 10- meter mast...	
17	Two Simple Two Elements Antennas for 80 and 40 meter Band: Credit Line: RADIO REF, 1971, # 8-9	51
	The two directional antennas were installed at the top of already existing mast for YAGI for 10 and 15 meter Band. The directional antennas were intended to use at the contest...	

Antennas for 50- MHz Band

18	Dipole Antenna for the 50-MHz Band: Igor Grigorov, VA3ZNW	52- 55
	Every radio amateur wants fill up any free space by an antenna. Not nearly enough antennas! So as I found a free space where I can install an antenna. True, it was a small place where I could install a small antenna. I choose a dipole antenna for 6 meter Band...	
19	RW4HFN Pyramidon Antenna for the 50- MHz Band: Igor Vakhreev, RW4HFN	56- 57
	The antenna, named as Pyramidon Antenna, is very simple to do. It is a broadband antenna so it is cover a wide range of the 50- MHz band and the antenna is not critical to the dimension...	
20	RW4HFN Pyradouble Antenna for the 50- MHz Band: Igor Vakhreev, RW4HFN	58- 59
	The antenna, named as Pyradouble Antenna, is very simple to do. It is a broadband antenna so it is cover a wide range of the 50- MHz band and the antenna is not critical to the dimension...	
21	RN3DEK Horizontal Butterfly Antenna for the 50- MHz Band: Yuriy Skutelis, RN3DEK	60- 61
	The Horizontal Butterfly antenna simulated in MMANA by RN3DEK is very simple to do. It is a broadband antenna so it is cover a wide range of the 50- MHz band and the antenna is not critical to the dimension...	

Table of Contents

		Page
22	RN3DEK Loop Antenna for the 50- MHz Band: Yuriy Skutelis, RN3DEK	62- 64
	The antenna made from aluminum pipe coated with PVC. Benefit of the pipe: you may easy cut the pipe with knife; you may easy bend the pipe without any special fixtures; the antenna holds the form; the conduit protected to work in atmospheric conditions...	
23	RN3DEK Two Element YAGI Antenna for the 50- MHz Band : Yuriy Skutelis, RN3DEK	65- 66
	The Simple Two Element YAGI antenna with tapering elements is easy to do and easy to tune. Base of the antenna is two tubes in diameter of 15- mm. Additional tubes in diameter of 13- mm allow tune the antenna in the resonance at the desired frequency at the 50- MHz band...	
24	RN3DEK Double Dipole Antenna for the 50- MHz Band : Yuriy Skutelis, RN3DEK	67- 68
	The Double Dipole Simple antenna with tapering elements is easy to do and easy to tune. The antenna has enough large sizes. However, diagram directivity of the antenna is similar to diagram directivity of two three element YAGI antennas placed in position reflector to reflector. ...	

Antennas for 145/435- MHz

25	UR0GT Dual Band Antenna for the 145 and 435- MHz Band: Nikolay Kudryavchenko, UR0GT	69- 71
	Dual band antennas for VHF/UHF band made on the base of the J- Antenna are popular among the radio amateurs...	

Antennas for 435- MHz

26	Collinear Antenna for 432- MHz Band: Nikolay Kudryavchenko, UR0GT	72- 73
	The simple collinear antenna may be made from a length of aluminum tube, copper tube or just a thick wire. You need a 130- cm length for antenna and 70 cm length for four counterpoises. Despite of simplicity of the design the antenna has very good parameters...	

Two Wire Lines

27	Struts for Two Wire Line from Old Coaxial Cable: Anatoli, RL1L , ex. (RA0C, EY9AF, RA6XPL, RA6PS, RA6PGY)	74
	It is possible struts for two wire line make from the outer sheath of old coaxial cable. The outer sheath of a coaxial cable is resistant to harsh operating conditions, while also very light in weight...	

Table of Contents

		Page
28	<p>Struts from Old Plastic Bottles: Sergei Kravchenko, US2INV</p> <p>It is possible very easy make struts for two wire line from old plastic bottles. Advantage of the struts is light weight, resistant to ultraviolet and of course almost no money (only time) to spend...</p>	75
Books		
29	<p>The Electrical Experimenter. September, 1917</p> <p>The Electrical Experimenter was an American technical science magazine that was published monthly. ... The Electrical Experimenter continued from May 1913 to July 1920 under that name, focusing on scientific articles about radio, and continued with a broader focus as Science and Invention until August 1931. However this issue is a special- it contains article on Tesla Tower (Blows up!) and on to interesting secret antennas from 1917...</p>	76
30	<p>Antennas. Tuning and Adjusting: By: Igor Grigorov, VA3ZNW</p> <p>This book was written by me and published 20 years ago. The book was published in Moscow. However, the Publishing House, where the book was published, closed, the book is not available at shops. So I decided paste scan of the book in the Antentop Library...</p>	77
31	<p>Antennas. Urban Design: By: Igor Grigorov, VA3ZNW</p> <p>This book was written by me and published 20 years ago. The book was published in Moscow. However, the Publishing House, where the book was published, closed, the book is not available at shops. So I decided paste scan of the book in the Antentop Library...</p>	78
Receiving Antennas		
32	<p>Receiving Antennas for LW and MW Band: R.W. Burhans, XMAN, 1428</p> <p>Amateur radio already has got LW bands- it is 2200- m (136- kHz) and 630- m (473- kHz). These interesting bands need not only transmitting but receiving antennas. The article is described several designs of receiving antennas for LW band...</p>	79- 81
33	<p>Three Elements Active Directional Receiving Loop HF Antenna: R. I. Miller and Nikolay Vyachin (RW4CF)</p> <p>The small sized directional antenna provides excellent receiving capability ever inside a room. The antenna was designed for receiving weak signals from amateur radio stations however the antenna may be used for receiving of the broadcasting radio stations...</p>	82- 83

Table of Contents

	Page
34	84
Low Noise Receiving Antenna for the 10- meter Band: Leonid Labutin, UA3CR	
The receiving antenna was used for satellite receiving in the 10 meter Band. The antenna was installed at window on the 7- floor of the twelve stores building...	
35	85
Wideband RX Antenna for 1.5- 30- MHz: "professor"	
This simple wideband dipole has SWR not more then 1.5:1.0 at the 1.5- 30- MHz. Dipole is not critical to location. It may be just lay down on the concrete roof, like it was made by author of the antenna, man with nick name "professor" from radioscanner.ru forum...	
36	86
SWL Antenna for HF Bands: Alex Demidenko, UA3443SWL, ex: UV3ACU, KB2QYR	
I cannot install an outdoor antenna at my location. After spending almost two months for experiments I managed design an indoor receiving antenna that works well on the HF bands...	

Propagation

37	87- 90
Observation of Anomalous Propagation of Radio Waves in the MW Band: Igor Grigorov, VA3ZNW	
In this short article I want to tell about my observations of the anomalous propagation on MW Band. These observations were done during 2019-2021 in Niagara Falls, Ontario and Buffalo, NY...	
38	91- 92
Odd Radio Reception: Kurt R Rudolph, KD7JYK	
Odd lack of radio reception of the AM, and FM broadcast bands, 530 kHz - 1710 kHz, and 88 MHz - 108 MHz, in the United States, May, June, 2021...	

History

39	91- 92
International Civil Aviation Organization Phonetic Alphabet	
I found this document in one old book that I bought at a Hamvention. It is interesting historic page from 1969...	

Patent

40	94- 100
Electrostatically- Shielded Loop Antenna	
Just description of the patent...
